THE GRAND PLEATED-PETALLED DAHLIA.

SERRATIPETALA, 8/- per dozen.—Glowing scarlet; the shape of this variety is absolutely unique amongst Dahlias. The petals, instead of being flat, are, as it were, pleated, with the edges divided into points, generally two and sometimes three points to a petal, giving a fish-tail or scalloped appearance. It is of remarkably free habit, and the petals *never drop*, which is the well-known drawback with the ordinary Single Dahlia. This makes it of great value for *cut bloom*, and room and table decoration. It has been exhibited several times, and has won great admiration. Wm. Robinson, Esq., editor of the *Garden*, says (*Garden*, Oct. 28th, 1893):—"Dahlia Serratipetala—This comes from Messrs. Kelway, and is very bright and singular looking."
